

# Buck Stove Presents... The Mountaineer 24

ZCBBXL unit in optional Deluxe Mantel with Mountaineer 24 log set

The Mountaineer 24 log set is our most realistic log set to date. Featuring details such as chainsaw marks in the wood and glowing embers on the logs, this log set brings the charm of a real wood fire to any living space with the convenience of gas heat. With a 40,000 BTU/H output and 99.9% efficiency, the Mountaineer 24 will give you the most bang for your buck! This log set will readily fit our optional 19HS heat shield blower and can fit most standard size fireplaces or may be placed in our optional ZCBB unit for even more added beauty (shown to the right). The Mountaineer comes as a modulating thermostat unit, or can be ordered to be millivolt ready to accept our hand or wall remotes for convenient control. Available as Natural Gas or L.P.

Manufactured By:
